

# LEDGIBLE | Portfolio Viewer

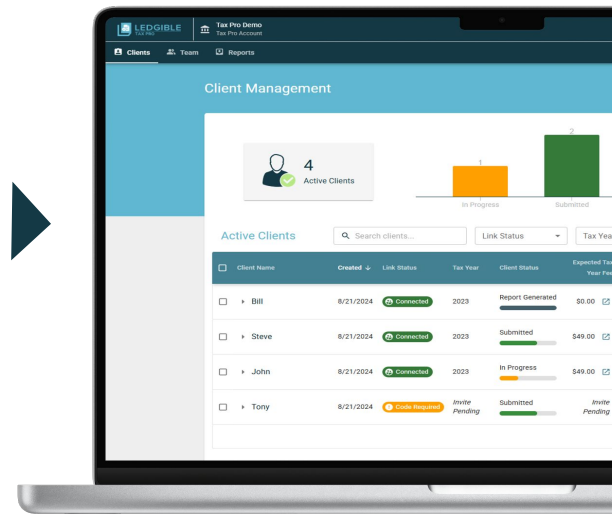

**Ledgible Portfolio Viewer** provides financial advisors and institutions the ability to present held-away crypto asset data in a comprehensive platform, providing insights on traditional and digital assets.

Give clients and advisors a 360° view of the client's crypto assets. Read only access to client venues ensures low risk and maximum visibility.

Clients see a summary of all their crypto held across all venues, including aggregated data like total balance, gain, and loss.

Advisors can see manage all their clients and see the same aggregated crypto information as their clients

## White Label Capability

- Immediate availability
- White label customization
- Full Ledgible Platform capabilities

## API Integration

- Integrate directly to your application
- Highly customizable
- Highly scalable and performant

**Crawl, Walk, Run:** Launch immediately with a white labeled instance while your development team integrates the API into your existing UI. Then when you're ready, switch from the white label instance to the fully integrated API. Achieve fast implementation with full integration.

Ledgible makes crypto, legible. Learn more about potential use cases of the Ledgible platform by contacting [sales@Ledgible.io](mailto:sales@Ledgible.io)
